Detail Area
Before installing insulation in wall:

1. Apply the supplied Energy Saver double sided tape to the top of the metal angle and remove the paper backing (this will help ensure a seal between the angle and the roof laminated facing.

2. Attach the angle to the bottom flange of eave strut. The downward flange of the angle should be plumb with the inside of the girts.

3. Apply the Energy Saver double sided tape to the downward leg of the angle, **do not remove the paper backing**.

4. Install wall insulation.

5. Peel paper from tape on downward leg of angle and complete installation of the Energy Saver wall liner fabric by sticking it to the downward leg to create a continuous envelope.
