

Pipe Wrap

Silvercote's pipe wrap insulation is the perfect DIY solution to wasteful heat loss on hot water pipes and sweating on cold water pipes. Pipe wrap can be used to insulate domestic hot and cold water pipes carrying water to the tap, or forced hot water pipes carrying water to radiators or baseboard heaters.

Not insulating your hot water pipes could be wasting up to 40% of your monthly home energy bill.

Features

- Can be applied to any diameter pipe
- Wraps around valves
- Helps to dampen sound and vibration

The length of pipe able to be covered will depend on the diameter of the pipe and the precision with which the insulation tape is installed.

- On a ½" diameter pipe, 17' of pipe could be wrapped
- On a ¾" diameter pipe, 12' of pipe could be wrapped
- On a 1" diameter pipe, 10' could be wrapped

Specifications

- 3" wide x 1" thick x 25' long (rolled)
- R-3.3 insulating value
- Fiberglass with foil backing
- Made in the U.S.A.
