

iQ WEB is an online insulation estimating tool available only from Silvercote that provides guaranteed estimates with speed, ease and accuracy. It is available 24/7 so that you can estimate projects at your convenience.

Your standard insulation and vapor retarder selections are stored in iQ WEB so that future estimates are pre-loaded with your preference. It will also maintain a library of your past estimates, which can be recreated at any time. Both of these features will save you valuable time when quoting insulation products.

On one proposal, you can estimate up to three buildings. Within seconds of entering the dimensions and thermal requirements, iQ WEB will produce a price proposal, a sketch of the building and a material cut list. iQ WEB helps to eliminate any confusion about what you need to order.

You'll find a wide range of our insulation products, including various thicknesses and vapor retarders, SolarGuard®, Energy Saver FP™ and Purlin Glide FP®. Enter your building dimensions and deductions to instantly receive your comprehensive estimate via email or fax.

Sign up for iQ WEB now! Visit iqweb.silvercote.com/signup.php to create an account and your login and password will be emailed to you when your account is activated.

- Available 24 hours a day, 7 days a week for your convenience
- Orders can be placed directly through iQ WEB. Maintains a library of past estimates, which can be recreated for rapid revisions
- Proposals are guaranteed for 90 days
- Wide selection of insulation thicknesses, facings and systems
